

SPEC TECH

ISSUE 1 - VOLUME 7

MONTHLY TOPIC: 2007 RE-CAP & 2008 WORLD OF CONCRETE

AUTHOR: MIKE SHULL, CDT
PRESIDENT

The year 2007 was a wild ride. The DJIA (INDEX) had a 52 week low of 11,927 compared to a 52 week high of 14,280. The price of Crude Oil went from \$50.00/ barrel in February 2007 to \$96.00/ barrel in December 2007. The sub prime markets continue to shake out and home sales look to finally be stabilizing. That being said, the economy continues to move ahead and the Non-Residential Construction Segment looks good for 2008. We appreciate all of your support in 2007.

The SpecChem team is just getting started; we are continuing to grow market share with our most valuable assets, our DISTRIBUTORS. We truly believe 2008 will indeed be GREAT!
