E-Cure

Water-Based Curing Compound

E-Cure: Hyundai Motors World Headquarters

Contractor: McCarthy Building Company, Inc.

Fountain Valley, CA

Distributor: White Cap Construction Supply-Chatsworth, CA

Over half a million square feet of concrete floors were cured, dustproofed and prepared for a secondary topping in one easy application by McCarthy's team with E-Cure. With its hybrid technology, E-Cure provides the best of both worlds by chemically hardening and dustproofing the concrete while using a specialized resin to form a moisture retaining membrane. The McCarthy Building Company was able to easily remove construction debris with general cleaning 5-7 days after they had applied E-Cure.

SpecChem provides the most comprehensive concrete chemical systems in the industry. For more information call your local SpecChem sales professional. 866.791.8700 or www.specchemllc.com
