

Final Finish

Rapid Hardening/Polymer-modified/Concrete Resurfacer

A one-component, rapid hardening, polymer modified concrete resurfacing mortar for smoothing, resurfacing, rubbing, and restoring concrete surfaces. Final Finish offers a unique long pot life but rapid hardening performance on the substrate to minimize waste and labor. Final Finish offers superior durability for all interior and exterior, horizontal, vertical and overhead concrete applications. Final Finish is also ideal as a trowel down underlayment and for repairs from a true feather edge up to 1/4".

Benefits

- **Versatile - patching, resurfacing or trowel down**
- **Fast setting with enhanced durability**
- **Ultra fine for easy application and finishing**
- **Advanced chemistry formulates an extended pot life**
- **Premium color blends to existing concrete surfaces**
- **Can be sealed, painted, colored, stained or covered**
- **Interior/exterior, horizontal, vertical and overhead**
- **Featheredge to 1/4" for exceptionally smooth repairs**
