

Cold Weather Product Storage

SPECCHEM
Solution to Service

REVIEWING PRODUCT STORAGE
TO MAINTAIN MAXIMUM
SHELF LIFE

Breakdown:

When cold weather hits use this guide to help ensure your SpecChem products are protected, to ensure maximum shelf life and performance. Learn what products need to be kept out of the cold and away from freezing conditions.

Cold Weather Prep:

Fall is here, and winter is right around the corner – meaning now is the time to review your product storage practices to ensure your products are properly protected to maintain both maximum shelf life and optimal performance.

Also, be sure and remind your customers that storing these products at temperatures below our recommendation can impact shelf life and performance.

The Following Must Be Protected Against Freezing Temperatures (below 32°F):

All Epoxy Products
