SpecFlow

SpecFlow: Aqua Tower - East Loop, Chicago

Contractor - James McHugh Construction Company

More than 30,000 Bags Used

SPECFLOW is a cement based, non-shrinking, self-leveling floor underlayment designed for interior use. This single component product produces a smooth subfloor that will accept floor coverings in as little as 12-18 hours after installation. Just mix SPECFLOW with water, pour or pump, and it will seek its own level to produce a smooth, flat, hard surface.

AQUA TOWER: 82 floor hotel, residential and commercial space.

Superior SpecChem service and product performance allowed James McHugh Construction Company to maintain an ambitious completion timetable without sacrificing quality. SpecFlow's self-leveling performance, ample work time and ability to be applied up to 2" kept McHugh on schedule and within budget.

Aqua won the 2008 American Architecture Award; Chicago Athenaeum Museum of Architecture and Design.

SpecFlow Performance:

- Exceptional adhesion and ability to withstand building dynamics
- Superior durability in a tough construction environment
- Excellent flow ability and finish to reduce labor cost
