SpecEtch Horizontal Surface Retarder

SpecEtch: California Health Care Facility California Department of Corrections \$1.1 Billion Project!

Hospital includes housing, clinical facilities, inmate visiting, rehabilitative and miscellaneous support facilities. The inmate health care facility will house and treat 1,734 male adult inmates. Seven such inmate medical facilities are planned throughout California.

All of the exposed concrete footings that come in contact with slab are sprayed with SpecChem SpecEtch after placing. SpecEtch retards the fresh concrete surface providing a roughened exposed aggregate finish which allows an excellent mechanical bond. This eliminates the costly and dusty sandblasting alternative prior to the slab placement.

SpecChem provides the most comprehensive concrete chemical systems in the industry. For more information call your local SpecChem sales professional. 866.791.8700 or www.specchemllc.com

SpecEtch

Horizontal Surface Retarder

- Ready to use
- Does not alter natural color of aggregate or concrete
- Non-flammable
- VOC Compliant

SpecRez

Water Based Dissipating Resin Curing Compound

- Ensures proper curing, resulting in stronger, more wear resistant concrete
- Water Base, VOC Compliant (VOC less than 100g/l)
- Helps minimize dusting

SpecStrip

Reactive Form Release Agent

- Improves release of formwork
- Reduces concrete buildup on formwork and liners
- Reduces cleaning of formwork
- Protects formwork against rust
