## SpecGrout - SC Multipurpose Grout Non-shrink, Non-metallic Grout

### SpecGrout: SW Florida County Demo Contractor: Team Fishell

SpecGrout was selected as the grout of choice by Vermeer ([www.vermeer.com](http://www.vermeer.com)) to back-fill microtrenches cut in asphalt roadways for the installation of fiber optic cable.

SpecGrout was chosen due to its exceptional flow, easy placement and Florida DOT approval. SpecGrout encapsulates and protects the cable after placement.

This method of encapsulating the fiber optic cable promises to expand as municipalities, cities and communities adopt this process versus directional boring. This process creates less disturbance in neighborhoods and is popular for areas with either lots of rock or lack of roadside area where directional boring is used.

*SpecChem provides the most comprehensive concrete chemical systems in the industry. For more information call your local SpecChem sales professional. 866.791.8700 or [www.specchemllc.com](http://www.specchemllc.com)*
