SpecStrip Plus

Premium reactive form release agent

SpecStrip Plus: IPC Construction

Contractor: Grupo Vila

Costa Rica

IPC Construction S.A. is a leading contractor in Costa Rica. IPC Construction uses SpecChem SpecStrip Plus for their steel forms. IPC Construction is a major housing developer in Costa Rica. Currently, they are constructing four housing projects in Costa Rica aimed to the middle class and upper middle class segment of the market.

The forms are made of aluminum. The walls are 4" thickness and steel reinforced to comply with the Costa Rica Seismic Code. They used SpecStrip Plus because they wanted to protect their aluminum forms and have a clean release of the concrete from the forms.

SpecChem provides the most comprehensive concrete chemical systems in the industry. For more information call your local SpecChem sales professional. 866.791.8700 or www.specchemllc.com

TriAct

Multipurpose form treatment

- Creates a quality reactive form release agent.
- An effective "seasoning agent" for new aluminum forms.
- An effective protective barrier to prevent fresh concrete from bonding to coated surfaces.

SpecBlast

Water based, bio-degradable concrete remover

- Ready-to-use - No mixing required.
- Bio-degradable, non-corrosive, low-odor, water based, won't contaminate ground water

SpecStrip Plus

Premium reactive form release

- Improves release of formwork
- Reduces concrete buildup on formwork and liners
- Reduces cleaning of formwork
- Protects formwork against rust
- Leaves no residue, stain or discoloration

Step 1

Form Seasoning WB

A water based treatment for new aluminum forms. It oxidizes the elemental aluminum on the surface of the new aluminum forms to properly season and prepare the form for use in the field.

Step 2

SpecChem Daily Form Release Agents

SpecStrip
SpecStrip Plus
SpecStrip Supreme

Step 3

TriAct

A concentrated, highly reactive mixture designed to be used as a reactive form release agent designed to clean and maintain quality aluminum forms in the field.

Add 1-5 gal. pail of TriAct to a drum of SpecChem Form Release every 3-4 weeks as a self-cleaning additive to your daily forming operation.

Step 4

SpecBlast

A chemically active, biodegradable liquid formulated to soften and remove hardened concrete build up from concrete forms, tools and equipment.
