

ARCHITECT AND ENGINEER SPECIFICATION UPDATE

SpecChem Strengthens Partnership with SpecLink-E

SpecChem is pleased to announce it's strengthened partnership with SpecLink-E. In our ongoing commitment to drive more concrete specifications, SpecChem has formed an alliance with SpecLink-E in order to build additional specifications across the United States.

SpecLink-E is a master guide specification writing, management, and production system with built-in intelligence designed to help architects and engineers dramatically speed up editing tasks and reduce specification production time while minimizing errors and omissions. Combined with the industry's most comprehensive and up-to-date master database, SpecLink-E enables the project spec writer to accelerate their specification development with unsurpassed accuracy and integrity.

SpecChem has tripled its product offering available to be specified by SpecLink-E subscribers. SpecChem's commitment to "distributor profitability" will only be enhanced by this strategic partnership.

In addition to this program, SpecChem continues to invest substantially in corporate specifications as well as regional specifications. SpecChem is a member of CSI and most of SpecChem's professionals have achieved their CDT designation from Concrete Specification Institute. Please reach out to your SpecChem professional salesperson in the near future to learn more about this program as well as setting Specifier targets in your market.
