

## Cure Hard GREENCONSCIOUS

### *Sodium silicate cure & dustproofer*

Cure Hard is a dustproofer and cure aid for freshly placed concrete. A member of the silicate family, a class of penetrating waterborne concrete densifiers. Silicates penetrate into the concrete and react with free lime to increase crystallization within the concrete matrix. This crystallization process binds, seals, and densifies the concrete surface acting as both a curing aid and dustproofer. When applied according to the technical data sheet Cure Hard will not inhibit the adhesion of any secondary toppings or discolor concrete. Cure Hard offers an easy to apply environmentally friendly solution to any concrete contractor.

- Can be used to correct surface dusting on existing slabs
- Easy to apply economical cure aid and sealer for fresh concrete
- Will not inhibit any secondary toppings or coatings
- Environmentally friendly 0 VOCs
